About Me

Experienced Software Developer with meticulous attention to detail and a passion for creating visually stunning and user-friendly web applications.

I bring a solid foundation in modern front-end frameworks.

Seeking a challenging role where I can showcase my expertise, collaborate with talented teams, and continuously expand my skill set. Eager to embrace new technologies and trends.

Experience

Applaudo Studios 2021 - 2023

React Developer

- Build Frontend applications from scratch with best practices and standards.
- Defining the requirements of the API, consuming RESTful web services, and process results.
- Agile development processes to meet requirements and follow through with the implementation.
- Work with developers teams, designers, and product managers, dividing responsibilities to solve problems.
- Follow the UI/UX best practice guidelines by Google and the design team.

Zur Studio 2019 - 2021

Fullstack Developer

- Designed and implemented engaging web layouts using React and React Native.
- Developed server-side functionalities with Express and MongoDB.
- Proficient in standard web development tools.
- Contributed to seamless user experiences and responsive design.
- Collaborated on cross-functional teams for successful project delivery.

Crossover 2020

Customer Support Agent

- Solving complex customer problems that the company's AI bot was unable to help with.
- Asking insightful questions that get to the root cause of the customer's problem.
- Generating solutions using product knowledge and provided knowledge bases.
