## About Me

Experienced Front End Developer with meticulous attention to detail and a passion for creating visually stunning and user-friendly web applications.
I bring a solid foundation in modern front-end technologies.
Seeking a challenging role where I can showcase my expertise, collaborate with talented teams, and continuously expand my skill set. Eager to embrace new technologies and trends, I aspire to grow into a full-stack developer and contribute to the development of cutting-edge, innovative projects.

## Experience

**Applaudo Studios 2021 - 2023**
React Developer

- Build Frontend applications from scratch with best practices and standards.
- Defining the requirements of the API, consuming RESTful web services, and process results.
- Creating prototypes that demonstrate the value and functionality of emerging technologies on the Web.
- Agile development processes to meet requirements and follow through with the implementation.
- Work with developers teams, designers, and product managers, dividing responsibilities to solve problems.
- Follow the UI/UX best practice guidelines by Google and the design team.

**Crossover 2020**
Customer Support Agent

- Solving complex customer problems that the company's AI bot was unable to help with.
- Asking insightful questions that get to the root cause of the customer's problem.
- Generating solutions using product knowledge and provided knowledge bases.

**Self-Employed 2019 - Ongoing**
Web Developer

- Web Design (HTML-CSS-JS)
- Responsive Design
- Shopify stores (Custom Themes)
- WordPress
- Ads: FB & Google Ads
